

8-6 Research Practice (Wikipedia)

You will be using the Wikipedia web site to research information you would consider yourself an expert on.

Directions:

1. Go to my web site and click on the [Wikipedia Link](#)
2. Pick any topic you would consider yourself an expert on and open the article about it by typing it in the search box.
3. Compile a list of information that you know for sure is true and you know is false on a scrap sheet of paper.
4. Find at least 10 pieces of information from this article.
5. You will then type your findings according to the requirements.

Requirements:

- Open a [blank canvas](#) and save it as P8 8-6 last name first name.
- Create a [Text Box](#) and place 8-6 Wikipedia in the center.
- Drag it up so it appears like a header.
- Place your name, date, and period on the right hand side of the text box.
- Create another text box and place the name of your topic in any color, font, and size you wish.
- Create a new text box and create two columns and head one true and false in the center of the column.

8-6 Research Practice (Wikipedia)

- Make each column a different font, size, and color of your choice.
- Make sure each “fact” has some type of bullet in front of it and they are aligned to the left.

- Use google images to place at least one picture of your topic on your document.
- Any pictures you place on your document must have either a frame, reflection, or shadow.

- Your document must have a background.
