

## 8-7 CHECKING SITES

You will be creating a document to check the information that you found on wikipedia for your topic from worksheet 8-6. You will do a google search and find three additional sites that are about or have articles on your topic. You will then meet the following requirements:

- Open a blank canvas and save it as **P8 8-7 Last Name, First Name**.
  - You can use any fonts, colors, sizes, etc. you want to make your document look good.
  - Create a Text box and place your Topic at the top of your canvas.
  
  - Type the word “Wikipedia” and create a link to your article.
  - Under “Wikipedia” using your copy and paste tools list 3 facts from that article.
    - ex. Star Wars was released to theaters in 1977.
  
  - Choose one of the sites about your topic that you found in your google search and create a link for it like you did for “Wikipedia”
  - Using your copy and paste tools find and list the same 3 facts from this new web site. **If the facts are different list it anyway.**
  
  - Create a link and copy and paste the 3 facts for your other two sites
  - Finally write a conclusion stating which facts are true.
  
  - Add in any backgrounds, shapes, pictures, etc. that will make your document look better
- Creativity Counts!**
